Indianapolis

10 miles—9 minutes, 3 seconds

Lowell

159 miles—176
minutes

Won 21 firsts
in the year
July, 1909, to
July, 1910

Louis Chevrolet in Schebler-Equipped Buick

Louis Chevrolet uses the Schebler Carburetor and no other on all his Buick cars. He says it gives him 10 miles per hour more than any other carburetor he can find. He has established American track records and holds the American road record established at Riverhead of 70 miles per hour for a road race. The Schebler Carburetor runs him 100, 200, or any other distance, without a falter, never missing an explosion. It is the Schebler air control and gasoline control that make such performances possible.
