MOTOR COMPANY
LOUIS CHEVROLET, PRESIDENT
INDIANAPOLIS, IND. U.S.A.

February 24th, 1923.

Muzzy-Lyon Company
Detroit, Michigan.

Attention Mr. David W. Rodger.

Gentlemen:

Answering your inquiry about the connecting rods which you lined for us with Mogul Metal for our racing cars, would say that they behaved splendidly and as far as we know they will keep on doing so, as after quite a bit of running they do not show any wear and we certainly expect to see them last a long time.

The conditions under which those bearings have to work is rather unusual except on racing motors, where they are subject to a very high bearing pressure and very high heat, as we turn those racing motors above 4000 R. P. M.

Yours very truly,
