

## THE WINNER

This sturdy little MONROE special which Gaston Chevrolet drove to victory in the 500-mile race was designed and built by us in our own factories.

Competing against a field of the fastest and most famous cars of two continents the winner attained an average speed of 88.55 miles an hour, making the 200 complete laps in 5:38:32, setting up the second highest record ever made on the local speedway.

The construction of every MONROE is supervised by the men who directed the building of this racer, and who at all times devote their entire interests to the further advancement of our product, consequently we feel that the MONROE can rightfully claim the distinction of being supreme in the class of lighter weight cars.
