Gentlemen:

One of the main factors contributing to the wonderful victory of the winning Monroe No. 4, driven by Gaston Chevrolet in the International Sweepstakes 500-mile race, was the co-operation given through your laboratories and facilities for steel treatment on gears, springs and other parts of the car.

Your expert analysis of the steels by W. R. Chapin, metallurgist, and the various heat treatments enabled this car to withstand every test of the most gruelling speed contest of modern times, and in acknowledging this service I wish to give my opinion that your concern represents the world's leading specialists on steels and their treatment.

Thanking you, I remain

Yours very truly,
